SOBRE MI

I am a computer engineer with strong analytical, deductive, and logical skills, and a problem-solving mindset. I am eager to learn new and interesting things, particularly regarding the latest technologies. I possess a theoretical foundation in artificial intelligence and machine learning, with a focus on intelligent agents, alongside both theoretical and practical knowledge of web development.

My primary experience lies in Research and Development (R&D), complemented by various web projects undertaken during my university studies.

I have also worked as a freelancer writing scripts for YouTube videos and providing support for AI projects. Additionally, I have experience in technical support and customer service.
